

Seye Olaleye

Junior front end engineer

📍 Surulere Lagos

📞 09135689758

@ Seyeolaleye06@gmail.com

Objective

To leverage my expertise in full-stack development and AI engineering to build scalable, intelligent systems that enhance user experiences. I aim to transition into AI infrastructure engineering, specializing in AI-powered applications, cloud computing, and system optimization. My goal is to become a Principal Software Engineer in AI Engineering, driving innovation in machine learning, automation, and AI-driven solutions.

Experience

Niit

Jan -

Junior front end engineer

Web Development: React, Tailwind CSS, I

Mobile Development: React Native (Expo), geofencing, authentication

- Backend: Java (Spring Boot), Node.js, MySQL, MongoDB
- DevOps & Testing: Docker, JUnit, Git

Skills

Html,css,JavaScript,react,react native,Java,springboot,junit,mongobd,git

Projects

Netflix clone

A streaming platform replica built with React Native (Expo) to improve UI/UX skills and API integration.

- Features include dynamic content display, user authentication, and responsive UI.
